

# Josh Kornbluth's THE MATHEMATICS OF CHANGE

is being made into a MOVIE!

Be a part of this historic event! These performances will be filmed with YOU laughing in the audience!

In his comic monologue, "The Mathematics of Change," Josh Kornbluth recounts his terrifying experiences as a would-be math whiz at Princeton University. Having been promised by his math-teacher father that he'll become "the greatest mathematician who ever lived," Josh immediately "hits the wall" at freshman calculus.

By the end of this hilarious, nerve-wracking adventure, much chalk will have been broken, hazardous work-study jobs will have been lost, and the physics department's pet catfish, Enrico, won't be the only one in deep water. Whether you love math or fear it like the plague, "The Mathematics of Change" will take you to the absolute limit -- and beyond.

**Two nights only!**  
**APRIL 1 & 2, 2011 @ 8:00PM**

**MSRI (Mathematical Sciences Research Institute)**  
**17 Gauss Way, Berkeley, CA**  
**(just above the Lawrence Hall of Science)**  
**Rub shoulders with math geniuses!**

**Tickets are \$25 at Brown Paper Tickets**  
**<http://www.brownpapertickets.com/event/157802>**

"Beneath its guffawing surface it tells a poignant story. Anyone who grew up feeling like a nerdy outsider can identify with these confessions of a misfit who clings with a desperate, blind tenacity to the notion of his own intellectual superiority." -- New York Times
