Julia Robinson Mathematics Festival

Thursday, May 23 • 9:00 am ~ 2:00 pm

University of New England

JRMF is named in honor of mathematician, Julia Robinson, who is known for her work on Hilbert's Tenth Problem. The goal of the festival is to inspire, delight and challenge students while working collaboratively.

All RSU 21 5th grade
students will participate in
an action packed
day of puzzles, challenges,
and games mentored by
RSU 21 & UNE
Mathematics Faculty. They
will also have an
opportunity to take a STEM
related excursion on
campus with UNE staff.

Major Sponsors:

Education Foundation of the Kennebunks and Arundel Mildred L. Day School

Supporters:

Hannaford Supermarket
Kennebunk Savings Bank
Biddeford Savings Bank
Texas Instruments
American Mathematical Society
Society for Industrial & Applied Mathematics

Challenge: What is the smallest number of pieces the plane can be cut into with two lines? With three lines? Four lines? Can you generalize?
