

Tensor Categories and Topological Quantum Field Theories Workshop Moved Online

Due to the COVID-19 virus outbreak, MSRI has determined that it would be best to no longer host the Tensor categories and topological quantum field theories workshop here at the Institute. Rather, we will move the workshop online. While we realize that this may come as a disappointment, we have been strongly advised to avoid gathering of large groups.

We are looking at this as an opportunity to improve our ability to hold virtual meetings, and hope that what we learn from this experiment will, in the long run, be a benefit to the mathematical community as a whole.

We are currently working on the logistics to make the talks available in real time, and to allow participants and speakers to interact in a dynamic fashion.

At this time, please cancel your travel plans. The workshop page contains an official notice of this change which can be shared with your institution, funding agency, and others to help you get reimbursement for the expenses you may have incurred.
